PRESENTATION DE LA FORMATION

Businesses and institutions need professionals who can evaluate AI, curate standards that apply to their enterprises, and implement strategies for complying with applicable laws and regulations.

This training teaches critical artificial intelligence governance concepts that are also integral to the AIGP certification exam. While not purely a "test prep" course, this training is appropriate for professionals who plan to certify, as well as for those who want to deepen their AI governance knowledge. Both the training and the exam are based on the same body of knowledge..

OBJECTIFS DE CETTE FORMATION

At the end of this training, the trainee will have the skills to :

- how to develop, integrate and deploy trustworthy AI systems in line with emerging laws and policies
- pursuing IAPP Artificial Intelligence Governance Professional certification

PUBLIC

Any professionals tasked with developing AI governance and risk management in their operations, and anyone pursuing IAPP Artificial Intelligence Governance Professional certification.

PREREQUIS

Aucun prérequis n'est nécessaire.

PROGRAMME DETAILLE (IN ENGLISH ONLY)

Formation uniquement animée en anglais

Introduction

1. Module 1: Foundations of artificial intelligence

Defines AI and machine learning, presents an overview of the different types of AI systems and their use cases, and positions AI models in the broader socio-cultural context.

2. Module 2: AI impacts on people and responsible AI principles

Outlines the core risks and harms posed by AI systems, the characteristics of trustworthy AI systems, and the principles essential to responsible and ethical AI.

3. Module 3: AI development life cycle

Describes the AI development life cycle and the broad context in which AI risks are managed.

4. Module 4: Implementing responsible AI governance and risk management

Explains how major AI stakeholders collaborate in a layered approach to manage AI risks while acknowledging AI systems' potential societal benefits.

5. Module 5: Implementing AI projects and systems

Outlines mapping, planning and scoping AI projects, testing and validating AI systems during development, and managing and monitoring AI systems after deployment.

6. Module 6: Current laws that apply to AI systems

Surveys the existing laws that govern the use of AI, outlines key GDPR intersections, and provides awareness of liability reform.

7. Module 7: Existing and emerging AI laws and standards

- Support de cours disponible sur votre compte personnel IAPP
- Outil distanciel : Teams

POUR ALLER PLUS LOIN

- Protection des données personnelles en Europe - Certification CIPP/E IAPP
- Gérer un programme de protection des données personnelles – Certification CIPM IAPP

PLUS D'INFOS

- [Contactez-nous](#)

Describes global AI-specific laws and the major frameworks and standards that exemplify how AI systems can be responsibly governed.

8. Module 8: Ongoing AI issues and concerns

Presents current discussions and ideas about AI governance, including awareness of legal issues, user concerns, and AI auditing and accountability issues.

Conclusion

MODALITES D'EVALUATION

Après la formation, le stagiaire active son « vouchen » depuis son compte IAPP pour s'enregistrer à l'examen de certification AIGP et choisir son rendez-vous en centre Pearson VUE ou à distance.
